HOW WE`VE CREATED NEW LEAGUE IN FIFA

After we downloaded the data from the site, we proceeded to create our patch. Since in our game you cannot create new data, but you can simply change it, we had to change the entire Irish league. To do this, we had to create all the uniforms of our clubs and change the team logos.

We didn't want to do everything in a simple way and therefore all the players had similar faces and their own minifaces. In addition, all player data including nationality and age growth weights are real.
